

# ESG Book—Building the World’s Leading ESG Data Platform

ESG data represents a large, and rapidly growing, market opportunity. Accurate data, accounting, analytics, and reporting are critical to the net zero transition. ESG Book is a leading ESG data provider building one of the largest independent ESG datasets on public equities along with proprietary scores, metrics and analytics.

ESG Book’s cloud-based platform makes ESG data accessible, consistent, and transparent, enabling financial markets to allocate capital towards more sustainable and higher impact assets. Covering over 50,000 companies globally, ESG Book enables companies to be custodians of their own data, provides framework-neutral sustainability information in real-time, and promotes transparency. ESG Book also allows users access to the fundamental data underlying each metric to understand how these scores are derived.<sup>37</sup>

## CASE STUDIES

### ESG Book—Building the World’s Leading ESG Data Platform

ESG Book’s innovative freemium model offers businesses free access to report their own data and view high-level summaries of peers’ data. Paid users can also dive into more detailed analysis of their own and competitor ratings. Financial institutions can use ESG Book to request data from portfolio companies and business customers, creating network effects as more users report through the platform and make their data available.

EIP led ESG Book’s \$35 million Series B round in June 2022, joined by Meridiam and Allianz X. Transparent and trustworthy ESG data is critical for investors to understand how companies are performing on climate metrics, and EIP expects that its partners can use ESG Book to assess their performance and compare with industry peers.

*“We are delighted to welcome ESG Book to our family of companies that empower the transition to net zero and support the principles of sustainability. ESG Book is EIP Europe’s tenth investment, and this partnership is driven by a shared vision for radical transparency in sustainability data. We look forward to supporting the tremendous momentum of the company as it builds the world’s leading ESG data platform.”*
